SUMMARY

Senior .NET/Angular Developer with 7+ years of experience building scalable web apps in cloud-native environments (Azure, Kubernetes). Skilled in microservices, modular monoliths, CI/CD, clean architecture, and Agile delivery. Proven record of shipping enterprise-grade solutions for finance, healthcare, and global clients. Expanding expertise into AI and machine learning technologies.

COMPETENCES

- Clouds: **Azure**
- DevOps toolchain: **Kubernetes**, Terraform, Docker, GitHub Actions
- Backend technologies: **C#**, Python 3, .NET 10, **ASP.NET Core**, MSSQL, PostgreSQL, MySQL, Redis
- .NET toolchain: **Entity Framework Core**, AutoMapper, MediatR, NUnit, XUnit, Moq, Fluent Assertions, Dapper
- OOP principles: **SOLID**, **CQRS**, DRY, KISS
- Architecture: Microservices, Event-driven, Domain-Driven Design (DDD), Clean Architecture
- Design patterns: **MVC**, Observer, Decorator, Singleton, Adapter, State, Strategy, Method and Abstract Factory
- Web platforms: Vue, **Angular**
- Web toolchain: HTML5, CSS3, TypeScript, JavaScript, RxJS, NgRx
- Other toolchain: JSON, REST API, OAuth/OIDC, Swagger/OpenAPI
- Distributed version-control systems: **GIT**, GitHub, Azure Repos

EXPERIENCE

06.2025 **Senior Angular/.NET Developer** .NET Framework 4.8 | **MySQL** | **SignalR** | Hangfire
- Xebia sp. z o.o., Wrocław

04.2026 A digital marketplace platform enabling customers to purchase and manage integrated cybersecurity and cloud services through a unified self-service market.

I was responsible for the following:

- Implementing consolidation workflows for transferring and aligning multiple digital service offerings between customer environments
- Developing and maintaining Angular/.NET features supporting service migration, operational continuity, and internal administration processes
- Providing L3 support for complex customer issues, mainly by investigating database-related problems and preparing corrective actions
- Performing code reviews and collaborating with the team to deliver reliable solutions in an Agile environment

02.2022	Senior Angular/.NET Developer	.NET Core MSSQL RabbitMQ Redis
-	<u>EY Global Services (Poland) sp. z o.o., Wrocław</u>	
08.2025	A financial services platform serving external clients and internal teams, with modules for generating detailed reports and ensuring compliance with financial regulations.	
	I was responsible for the following:	
	• Developing solutions using a variety of technologies and tools to for cloud-based systems • Applying object-oriented and functional programming styles to real-world software engineering problems • Adopt Agile software delivery techniques and technologies including Continuous Integration and Continuous Delivery (CI/CD) • Performing code reviews and guiding other team members to deliver best results to our Clients	
10.2020	Regular Angular/.NET Developer	Angular .NET MSSQL
-	<u>LuxMed sp. z o.o., Warszawa</u>	
01.2022	A patient-facing web portal enabling patients to access their appointments, medical history, and healthcare services online.	
	I was responsible for the following:	
	• Develop new products and add new functionality to existing software systems • Write clean, scalable code using C# programming language according to the companies development specifications • Close cooperation with software architects and business analysts	
12.2019	Regular Full Stack .NET Developer	Blazor .NET MSSQL
-	<u>Alior Bank S.A., Gdańsk</u>	
09.2020	A credit application assessment system that evaluated submitted data and produced a decision score to automatically approve, escalate for manual review, or reject applications.	
	I was responsible for the following:	
	• Develop new products and add new functionality to existing software systems • Proactively research latest technologies and advice on usability to the development team • Revise, update, refactor and debug code	
01.2019	Junior Vue/.NET Developer	Vue .NET MSSQL
-	<u>Sprint S.A., Gdańsk</u>	
11.2019	A smart city platform aggregating real-time sensor data — traffic conditions, tram delays, and incident alerts — displayed on public boards to support city-wide traffic rerouting and coordination.	
	I was responsible for the following:	
	• Software development based on provided requirements (C#) • Software development according to corresponding standards • Close cooperation with software architects and business analysts	

09.2018	Junior Angular/.NET Developer	Angular .NET MSSQL
-	Infoprojekt sp. z o.o., Gdańsk	
12.2018	A short-term internal project delivering a simple leave management tool.	
	I was responsible for the following:	
	• Continuously design, develop, and test web solutions (C#) • Providing high quality standards of programming • Operate effectively within an agile development model	
10.2017	Quality Assurance	.NET Selenium Web Driver
-	ITMAGINATION sp. z o.o., Płock	
09.2018	Internal tooling projects covering document automation, process optimization, and workflow management for small and mid-sized organizations.	
	I was responsible for the following:	
	• Creating and executing test cases based on requirements • Co-operation with development team to provide the best solutions • Analyzing and monitoring whole testing process to ensure functionality and propose amendments if necessary • Implementing automated tests	
07.2016	Junior Engineer for testing and analysis	.NET
-	Sii sp. z o.o., Gdańsk	
09.2017	Testing and analysis of embedded systems for the automotive industry, covering automated test development and validation of hardware-specific components.	
	I was responsible for the following:	
	• Analysis of project documentation • Designing test specification based on system specification • Implementing, code reviewing and refactoring automated tests (C#) • Executing automated and manual tests of embedded systems • Working on test process improvement and test automation • Using laboratory measurement equipment and other tools specific for automotive industry for problem analysis and debugging	
03.2015	Intern Linux Software Engineer	🐧
-	Intel Technology Poland sp. z o.o., Gdańsk	
10.2015	Linux kernel module development and validation, including work on software RAID, contributing to system-level software components across multiple stages of the development lifecycle.	
	I was responsible for the following:	
	• Designing, developing, enhancing and validating various class features for Linux kernel modules (C/C++) • Actively participating in all stages of software development life-cycle • Documenting software specifications and requirements • Defining functional and non-functional requirements for software/hardware	

- 10.2014** **Designer**
- Enamor System sp. z o.o., Gdańsk
- 02.2015** Design and modelling of electronic components for fire protection systems, with involvement in safety object analysis and platform security management.
I was responsible for the following:
- Designing and modelling of electronic components that are used in fire protection system extracting Autodesk Inc. products
 - Analysis of the safety objects
 - Involvement in the implementation of platform security management ZEW.SMS
 - Maintenance of the safety systems

EDUCATION

- 10.2010** University name: **Gdańsk University of Technology**
- Faculty: Electrical and Control Engineering
- 01.2017** Field: Electrical Engineering
Degree: **Master of Science, engineer**

SKILLS AND OTHER COMPETENCE

Languages	Soft Skills	Development Tools
• Polish - native • English - intermediate B2	• Technical leadership • Problem-solving • Team collaboration • Communication	• Rider • WebStorm • Visual Studio Code • Azure DevOps

INTERESTS

Cloud architecture, DevOps, AI/ML, playing guitar
